ery Farmer Should Investigate as to Character of Feathered Creatures.

Every farmer and gamekeeper should ave a copy of the biological survey's report on the stomachs of birds of prey, and railway plants located in regions cays Forest and Stream. Besides impuremental transmismense quantities of mice, hawks and swis kill snakes, rata, weasels, skunks and squirrels, all of which species de-stroy more or less young game birds voltage wires are so great as to warrant and the eggs of game birds. There-fore it becomes necessary to know whether the bird of prey himself or all these other enemies kill the most probably almost always the killing of one of your game preservers, whether and fry, for instance, are not any kind of bird, but certain species of fish, you are probably helping to thin your trout by removing these birds, since the lat-ter doubtless prey more on the spawn devourers than on the trout. This

Or, and hence harder to catch, and live mmonly in deeper water than other scien; so that what the heron and kingfisher get are no doubt generally the enemies of your trout.

GIVING A TIP ON A TIP. ervant Patron Finds Out a Few Things While in a Brooklyn Barber Shop.

An observant patron of a swell barber shop, according to the Brooklyn Eagle, has noticed that the tonsorial artist of nowadays is not only not the the answers were: "Oh, he's looking its top would be in the space lately ocfine," or "He's looking bad," or something similar, again and again. When
the sat up the observant patron asked hole over the top of the rod, thus ascercustomer he wants to know if the cusbarber: 'How's Tom to-day?' and if the reply is 'Fine!' it means a big tip. Pretty fair means a reasonable tip, and "He's looking real bad' means no

STILL IN CHURCH SPIRE.

Distillers at Quezac, France, Adopt Novel Plan to Checkmate Customs Officials.

Not long ago an interesting discovery. was made at Quezac, France, by a couple of officers of the customs, says the Phila-delphia Ledger. As the result of anonymous information they climbed into the spire of the church, and after a caredating from the seventeenth century, was yet in a perfect state of preservation and capable of being worked. Nat-urally the requirements of the law with regard to apparatus of this description had not been complied with in this case, but who was the offender? The vicar in charge of the building? The sacristan who visited weekly? Interrogated, the former declared that he had only reently come tuto the parish and had never set foot in the spire. He was, therefore, totally ignorant of the exist-ence of the incriminating vessel. The sacristan, however, could not allege so railed an excuse, and his explanation not being considered satisfactory, he will be proceeded against.

MEXICAN WEED DANGEROUS "Marihuana" Habit Gets Hold of Men and Permanent Dementia

Manuel Guerrero and Florencio Pinc had the "marihuana" habit, says the Mexican Herald, and for the last few weeks had been smoking big cigarettes weeks has seen smoking big cigarettes in which tobacco was mixed with the dangerous wood. Tunsday afternoon the two men amoked cigarettes com-posed of tobacco in amalier proportion than marihuana, and after a few minutes ran amuck. They went out into the street shouting, vociferating and at-tanking everybody. First they marched hand in hand, declaring that they were the bravest mon on earth and would kill anybody who dared to say a word to the contrary, but at last Pino declared that he was still braver than his friend, and a fight followed, the two receiving dangerous wounds. They were cap-tured and sent to the hospital, where they had to be put into straightjuckets. It is feared that the two men, if they ocover from their wounds, will lo their minds permanently, as is the case often with marihuana smokers.

Select Only Healthy Localities, Unhealthy localities are instinctive-ly avoided by swallows and other migratory birds. They are never to be found in districts where epidemte diseases prevail. The districts which they select as their temporary homes, are in all respects the more beautiful. in all respects the most healthy

A Perfect Painless Pill

RIENDLY BIRDS OF PREY, LIVE WIRES AND FIRE RISKS MILK REFORM IN CHICAGO.

Chances of Configurations, Where Energetic Health Commissioner of Electricity Is Used to Any Extent, Are Large.

In almost all telephone and telegraph offices, and in many electric lighting and railway plants located in regions sion circuits, says S. H. Bunnell, in the Engineering Magazine, the chances of voltage wires are so great as to warrant a most careful investigation of the sit- lity as Chicago should be from 24 to uation by a skilled engineer. This is an autcome of the rapid multiplication of power circuits throughout the country game before judgment of his harmful-in the development of the long-distance ness. The killing of a hawk or owl is transmission of electrical energy of potentials ranging from 5,000 to 60,000 volts. Special overhead construction for or not be takes some game in pay. You might as well abolish policemen because they sometimes offend. Sportamen wage but the work his hardly been begun as war against herons, kingfishers and yet. A high-tension "cross" on a lowishhawks. Now, since it is well known tension tine may easily start fires at that the main devourers of trout spawn and fry, for instance, are not any kind nothing of the risk to human life. Ordinary protective devices in the way of fuses, automatic cutouts and circuit breakers are usually effective up to 5,000 automatic cutouts and circuit volts, but beyond this potential the only safe course appears to be the absolute prevention of any contact whatever between circuits which literally carry "chained lightning" and those of lower pressure. The latest rules of the na-tional board of fire underwriters are suggeative in detail as to how to avoid these serious dangers.

SHOOTING A SHARPSHOOTER IF

Japanese Captain Uses Coolness and Ingenuity in Bringing Cossack to Earth.

Here is an interesting account of the colless and ingenuity with which a "If it proves practical it probably will Japanese captain put a stop to the work of a Russian sharpshooter, who was enoquacious individual he was before of a Russian sharpsheoter, who was enloquacious individual he was before funny papers got after him, but that he hat lapsed into a brevity of expression that is monotonous; so monotonous, indeed, that the observer became anxious recently while being shaved as to whether there were not shaved as to whether there were not in a continual his face, directly across the eyes, and price of radium has gone up 40 per cent. some secret purpose in a continual his face, directly across the eyes, and price of radium has gone up 40 per cent took effect in a small tree behind him. In the last two or three months on achearing to "Tom." It was "Seen Tom The captain rose quietly, and, taking a to-day?" "How's Tom to-day?" And ramrod, stuck it in the ground so that he sat up the observant patron asked his barber if it meant anything. "Yes," replied the knight of the brush and shears, with a smile. "It's to find out about tips. When a barber happens to get hold of another barber's regular dependent from its boughs. A moment later six rifles spoke at the command of er gives tips and he asks the other the Jap captain, and a Cossack dropped from the tree, clutching wildly at moss and branches as he fell. His last

ICE PLANT OPERATORS FEW

Scarcely One Engineer in Twenty Can Fulfill Requirements of the Position.

Knowledge of the operation of artificial ice plants is becoming a valuable asset to the electrician who seeks to advance to the position of manager of a lighting plant south of Mason and Dixon's line. On the authority of one capitalist it is easier to get 20 engineers posted in electricity than one who can operate an ice plant. He says the value of cold storage plants and the necessity for their existence in the south are being slowly grasped and these offer a still larger field for growth and addition to both ice and electric plants. The economy of the dual operation of the two lines in one Desecration of graves plant is emphasized in this part of the ountry, where the long summer even- degree. Mother, wife and daughter poings are spent out of doors and little burden placed on the lighting plant, the power of which may be readily used in the refrigerating plant. He cites one case in which, with the addition of an oller and fireman to the regular force of a 300 km alternating plant, 100 tons of fee were added to the daily product.

FORTIFYING PORT ARTHUR.

Work Done Mainly by Manual Labor -Coolies Paid Seven and Eight Cents a Day.

The work of fortifying was done mairly by manual labor, with as little use of machinery as possible. All the dirt for the fills and the embankments and that removed from the cuts was dug up by primitive Chinese shovels, and carried in baskets, two of which were suspended upon a pole balanced over a coolie's shoulder, says the Chi-cago Record-Herald. Instead of using pumps to get the water out of depres-sions, tightly woven baskets with a rope stout men so as to carry water from one reservoir to another higher, whence in the same manner it was lifted to an other, and so on to the required height. So cheap was human labor that these primitive methods were really the most economical, seven or eight cents a day being considered high wages for a coolle,

Use of Music in Surgery.

music can be put is to stop the flow of consumes 16 quarts of milk a day and flood from a wound. A British army on this diet thrives and grows fat. He doctor noticed that when a wounded oldier was taken to within an easy hearing distance of music hemorrhage die was greatly reduced or stopped mis Neither he nor others, who confirmed his observations, could understand how this phenomenon was brought about, but it is now believed that the vibration of the air produced by the faint, in which case the action of the revolutionary frishman, who chuckles heart is so considerably lessened that with joy as he sees the victims the overflow of blood is reduced.

A Summer Cold,

Metropolis Is Striving for Needed Changes.

One is giad to find the energetic health commissioner of Chicago taking up the needed reform of the delay in shipping milk and delivering it to city households, says the American Medicine Mag-It seems strange in these days of suburban trains and trolleys that the bulk of the milk used in such a is really criminal, and should be made There is no reason why the milk should ever be over 12 hours old when delivered. It is well known by every physician that the older it is when frunk the less its food value and the creater the danger, and when milk is er 24 hours old it probably does more harm than good. Are we not fast reachag-indeed, have we not already come o-the time when bulk milk should be nterdicted for use by children, and only that bottled in the country, and at ace after milking, allowed? About 15 per cent, of all deaths is of children five years of age, and of these certainly a large proportion is due to old, poor, impure and diseased milk. The most expensive milk in the long run is The low-priced milk is the poorest in nutritive value and the richest in disease. Its use by chil-tren should be discouraged in the pub-

ANOTHER USE FOR RADIUM Adoption in Ocean Telegraphy Proves Practical, Price Will Surely Advance.

"A new use has been found for radium," said Robert F. Amend, the repreount of the large demand and the comparatively scarce supply. Our house represents the Curies of Paris, the original discoverers of the new metal, and their product is by far the best manufactured. They have made little of late, however. Considerable radium of a cheaper grade is being made in Germany. For medicinal purposes no proof as a curiosity."
